

Set Up E-mail on an Android Phone

For 1&1 e-mail accounts

Learn how to set up your 1&1 e-mail account on your Android smartphone, allowing you to send and receive e-mails wherever you go.

The images used in this guide reflect Android OS 6.0.1 (Marshmallow).

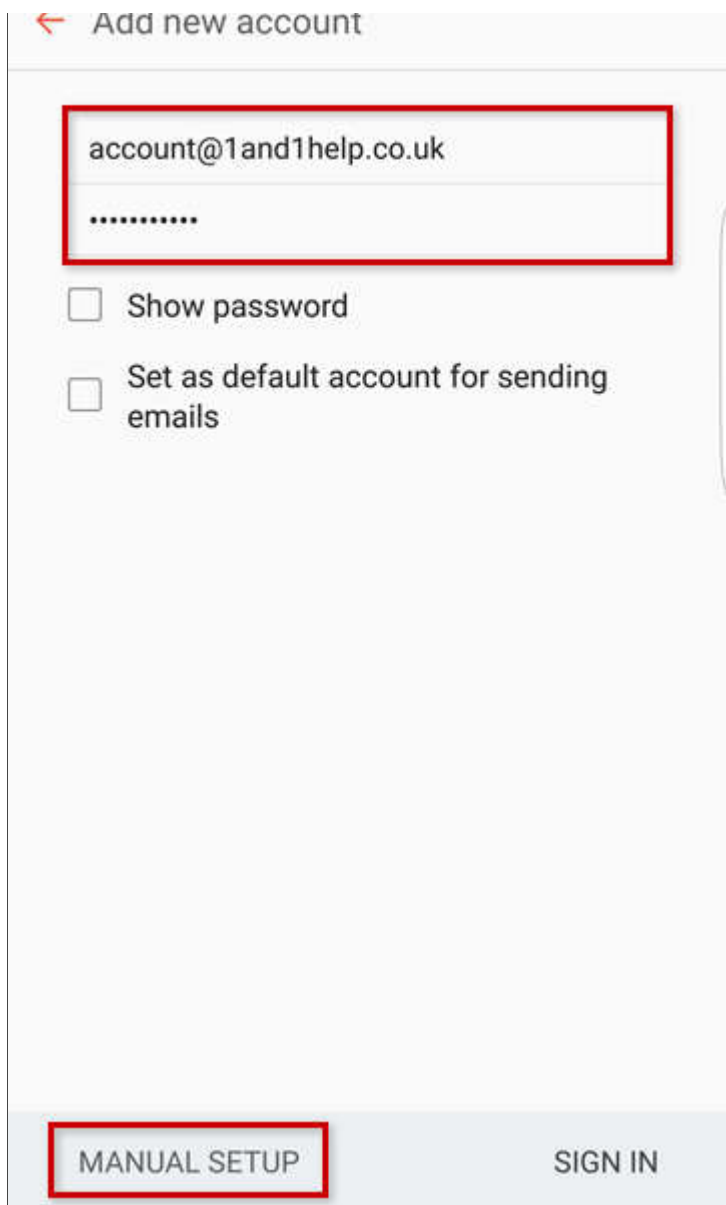

Before you begin, you will need to [Create an E-mail Account in Your 1&1 Package](#).

Step 1

From your Android phone's Home screen, go to **Settings > Accounts > Add Account**, and if necessary, choose the account type **E-mail**.

Step 2

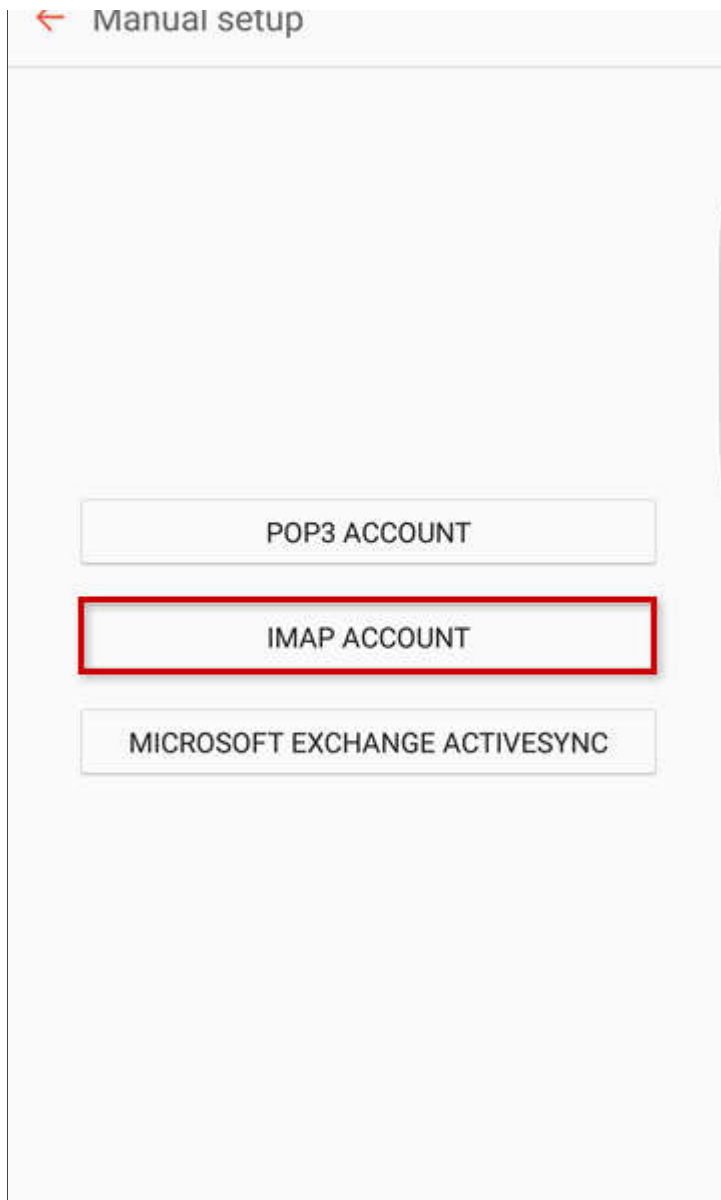

Enter your e-mail address and password, and press **Manual Setup**.

Add New Account Screen

Step 3

Choose **IMAP Account**.

Manual Setup Screen

Step 4

Enter the following **incoming and outgoing server** information and press **Sign In (C)** when finished:

Incoming Server (A)

Field	Entry
IMAP server	imap.1and1.co.uk
Security type	SSL
Port	993

SMTP server	auth.smtp.1and1.co.uk
Security type	TLS
Port	587
Authentication required before sending e-mails	Checked
User name	Your full e-mail address
Password	Your e-mail address password

1&1 Help Centre

manual setup

E-mail Sync Settings

Step 6

Set your **Account name** (optional) and the name that will be displayed in outgoing e-mails. It is suggested to use your e-mail address as the account name to differentiate it from any other e-mail accounts you may set up on your phone.

Finally, press **Done** to finish.

Your account has been set up. You can now change your account name and your name for outgoing email.

Account name (optional)
Account@1and1help.co.uk

Your name (for outgoing email)
John Doe

DONE

Edit Names Screen

The setup is complete. Your phone should download and display your recent e-mails in your default application.
