

## Set Up E-mail Account in Apple Mail

*For Mac OS 10.12.4*

**Follow these steps to configure the Apple Mail e-mail client for use with your 1&1 Mail Basic account using the IMAP Protocol.**

E-mail clients like Apple Mail let you send and receive e-mails without accessing 1&1 WebMail.

### Step 1

Start **Apple Mail**.

*Apple Mail Icon*

### Step 2

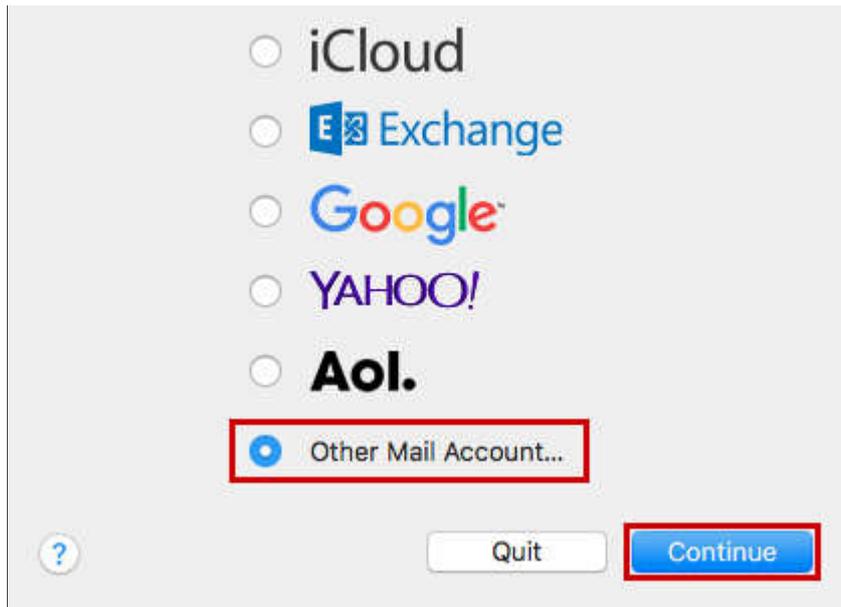

If you have already set up an account in Apple Mail, click **Mail > Add Account** in the menu.

If you are using Apple Mail for the first time, you can skip this step.  Ap

*Apple Mail Menu*

### Step 3

In the **Mail account provider** window, choose the option **Other Mail Account...** and click **Continue**.

*Mail Account Provider selection*

#### Step 4

Enter your **name**, **e-mail address**, and **e-mail password**. Then, click **Sign In**.

**E-I**

*E-mail Account credentials*

[\(Click here if you have forgotten the password to your mailbox.\)](#)

#### Step 5

Enter **imap.1and1.co.uk** in the **Incoming Mail Server** field and **auth.smtp.1and1.co.uk** in the **Outgoing Mail Server** field. Then, click **Sign In**.

**M€**

*Mail Server settings*

#### **Please note:**

The settings above use the recommended **IMAP** protocol. If you prefer instead to use **POP3**, change the **Account Type** to **POP3** and enter **pop.1and1.co.uk** in the **Incoming Mail Server** field.

#### Step 6

Select the apps that you want to use with your mailbox and click **Done**. **Ap**

*App selection*
